## **Watching You**

Watchin' you, while you sleep My hand on your breast feels you heartbips Wispering in your ears Explaining the way you make me feel You make my dreams come true The soul i missed, i found in you So addicted to your love oh you always have the best place in my heart

If there was only one place, it would be by your side. Coz just with you on my side, i can make it right If there was only one place, would it be by my side? Would you share all your dreams with me for the rest of our liv es?

I hope that you will always stay here Coz without you, life won't be the same With you i share my world I'm so glad to be your girl For you to make me everything

What we have is so hard to fine So i sold on to it till the end of time I know that i feel best 'coz why would You guy give me the best ? I will always be grateful for what we have

if there was only one place, it would be by your side. coz just with you on my side, i can make it right if there was only one place, would it be by my side? would you share all your dreams with me for the rest of our liv es?
