

Worth My While

Ayra Starr

I like it when you give it up
Give me your all, baby, give it up
Make it worth my while (give it up)
Make it worth my while (while, while, while, while)

And boy, you should know this ain't love
Pick up your feelings, it's just a crush
Make your girl say wow (give it up)
Make it worth my while

Hold up, hear me out
Baby, I been here before
That's why mi tell you mi nuh wah nobody fi love
But you got lots of money, bring it, come
Make it worth my while, baby
Do nuh waste my time 'cause mi worth every dime, so don't act like you don't
know it
Say you want it, better show me
You better show me

I only call you whenever I feel like
I only call you in the late of the night, time
So slow down
I'm not tryna go there now

I like it when you give it up
Give me your all, baby, give it up
Make your girl say wow (give it up)
Make it worth my while (while, while, while, while)

And boy, you should know this ain't love
Pick up your feelings, it's just a crush
Make your girl say wow (give it up)
Make it worth my while

'Cause I be pullin' on your heart strings (pullin' on ya, pullin' on ya)
I hit every note, with every stroke
Mind you fall in
Baby, don't get too close (get too close)
I could give you a real label
If you're bringing more than dick to the table
We can spend time, get facials
Then I send ya right back where you came from

Only call you whenever I feel like
I only call you in the late of the nighttime
Slow down
I'm not tryna go there now

I like it when you give it up
Give me your all, baby, give it up
Make it worth my while (give it up)
Make it worth my while (while, while, while, while)

And boy, you should know this ain't love
Pick up your feelings, it's just a crush
Make a girl say wow

Make it worth my while

Yeah, surprise me
Maybe add a couple zeros
Try to impress me
By acting like my hero
But you know say me I get my fire
And you know say me I get my raba

They can't contest me
The other girls you like
So get your mind right
Might need you over tonight (tonight)
So be on standby

Put that shit on silence, I don't like notifications
Me and you together, minus the multiplication (minus the multiplication)
Now buss it down, yeah

I only call you whenever I feel like
I only call you in the late of the nighttime
Slow down
I'm not tryna get there now, ow

Buss it down for me
Do it on the beat
Get down on your knees
Get down on your knees

Buss it down for me
Do it on the beat
Get down on your knees
Get down on your knees

Buss it down for me
Do it on the beat
Get down on your knees
Get down on your knees

Buss it down for me
Do it on the beat
Get down on your knees
Getti wine for me
