

Supercharged

Ayron Jones

Motor city, motor turning
Got no quitting, just a little bit out of control
Keep it running, always gunning
Love was never something keeping me from selling my soul

You hit me like a lightning strike from the sky
Now everything you do can make me ignite

Hey now, you can be my breakdown, setting the fire
You're my bizarre, I'm supercharged
Hey now, everybody needs a little spark in the wire
You shock my heart, I'm supercharged
So light me up like a star
So light me up like a star

Got me burning, hips keep me churning
Got a hold now and you know that I ain't letting you go
You can take it, stirred and shaken
Flip the switch and now you feel me losing all my control

You hit me like a lightning strike from the sky
Now everything you do can make me ignite

Hey now, you can be my breakdown, setting the fire
You're my bizarre, I'm supercharged
Hey now, everybody needs a little spark in the wire
You shock my heart, I'm supercharged
So light me up like a star
So light me up like a star

Hey now, you can be my breakdown, setting the fire
You're my bizarre, I'm supercharged
Hey now, everybody needs a little spark in the wire
You shock my heart, I'm supercharged

You hit me like a lightning strike from the sky
Now everything you do can make me ignite

Hey now, you can be my breakdown, setting the fire
You're my bizarre, I'm supercharged
Hey now, everybody needs a little spark in the wire
You shock my heart, I'm supercharged
So light me up like a star
So light me up like a star
So light me up like a star
