That's All I Want

Take it from me That you're gonna be in love Just give yourself some time You're just in a shaky frame of mind Take it from me That everyone's not that way Just out to break your heart So baby don't fall apart

I know that it hurts sometimes But girl if you let me ride I'll make you feel the way you want I'll make you feel like you're in love Don't want you to compromise We can just take our time Whatever makes you feel you're loved That's all I want

Take it from me You're gonna love someone I can see it in your eyes Somebody's gotta treat you right

Take it from me Your life is bound to change He'll never, ever break your heart You'll never have to feel that pain

You have this tendency to blame things on yourself Has it not occurred to you, that it may be someone else There is an urgency to change the way you feel Well I'm here to make the way for you Girl you're not by yourself
