

# Amazing

AZ

Yeah, you know  
Nigga like me, I love this rap shit  
I be feeling like one of them  
Them ball players like Lebron or Kyrie  
You know, I got dough  
I can leave you but if I leave  
You still won't love me

Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many artists can't even tame this, we asians  
Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many things to be done of raiding, it's amazing

Moments in time, alone in my mind  
Memories fly birth, it was a bonus to rhyme  
I'm soaking in shine, see colors, it's a dope design  
Got a kite for my nigga Ike, what he spoke was divine  
Cope was in crime, I caught it over grams like spans was shortened  
Plans aborted, killers even ran to avoid it  
The circle, from Buddha bless to us puffing purple  
Public defenders cuffed and crossed enough to judge a jury  
Fuck a curfew, street lights kept it bright  
Repped it right 'til the time came and left the life  
From the fetus to vast prestigious, platinum features  
Physicures is my black Adidas, blast the speakers  
Police paragraphs are deepest, I'm what has seizures  
Like sculptures, I handcraft my pieces  
Belief is staying down 'til your haters drown  
When you looking for love and it ain't around, I take the crown  
Still here, still real and real, into praying no fear, feel it in the air

I'm on that good vine time, what if we cross a line?  
And she's over, relax and free your mind

Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many artists can't even tame this, we asians  
Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many things to be done of raiding, it's amazing

Life reflections on my morning run, feeling top gun  
Pecs flexing in the morning sun, blessings on the hunt  
These are dolphins, it's my dopamine, clean cocaine  
Keep me focused, raise my poka-mine  
Coping as I lean off the negative thoughts  
Have it over me like vampires, I choose to  
Feed the wolf of faith 'cause you don't fear lies  
I rap my secrets into tobacco stuff than prentice  
I leap into the sky, fly high on you stand-by's  
'Cause life don't wait, better take your cake and eat it in the sun

Life said that's happening to you until you pick one  
So much uncertainties, certainly causing anxiety  
I swear the Uber robot dog is A and iron me  
But you can't stop the foot with March of time  
You either get in line or your ass get left behind  
But you can't miss me with the marker that beasting my palm  
'Cause I'll be raising chickens and harvesting on my farm  
My Apple Watch alerts me, I be in track  
By sight of light but still I think I'm free  
My biometric say I'm moving at a good speed  
My mind drifts again to another place in scene

Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many artists can't even tame this, we asians  
Relax and throw one up  
Feeling good, just pour me a cup  
So what? Nigga, we made it  
So many things to be done of raiding, it's amazing

Nigga, we made it (We made it)  
Nigga, we made it (We made it)  
Nigga, we made it  
Celebrate 'cause we made it
