

Walking In Circles

Azure Ray

Sinking eyes
Heavy spirit, your drifting mind
Weave the middle of the passing time
Hoping we would never show it

So these words from your mouth
I thought I was strong until my strength wore out
I was chasing this shadow's end
I didn't create it

It was long long long enough
I lost sight of what it's worth
It was long long long enough

Do you want to be named
In the end as a hunter or game
You're hurt or your hurt is the same
There's still part of me tired

And where have you been
Did you look did you take it all in
Are you walking in circles again
Like you lost the horizon

It was long long long enough
I was lost in a flash of light
It was long long long enough

Long long long enough
