We Are Mice

It's all in the eyes The reckless way we dream to die Our past is our future The present lies

Somewhere between our hearts and minds For those with no future We'll touch hands on the street Smile and keep moving on towards the heat

So keep this a secret our lot in life They are elephants we are mice We'll walk this earth somnambulant kin With broken hearts that cannot mend

Losers first and second men We'll do our best to blend in You could reach out for my hand and I yours Deliver water to soothe the burn

We'll drink our tears and thirst for more It's our lot in life They are elephants we are mice So keep this a secret

Keep this a secret We are mice **Azure Ray**
