

Wolves

Azure Ryder

I dropped my heart in auburn leaves
And held the moon between my fingertip
The night was stolen by the thieves
But you wasn't in love, found a home in me

The taste of silver rain is never gonna fill you up
The way the candle sways

Could we run with the wolves
If this love isn't the one we choose?
Are you ready to release me now
And let the sky fall to the ground?
Could we run with the wolves?

You swept me up in evergreen
A colour that I didn't know existed
And I caught in the Holocene
We're both following time instead of taking what we need

The taste of silver rain is never gonna fill you up
The way the candle sways

Could we run with the wolves
If this love isn't the one we choose?
Are you ready to release me now
And let the sky fall to the ground?
Could we run with the wolves?

Are we brave enough to change
A love that's gonna make us break?
Are we brave enough to change
A heart that we couldn't breathe without?

Could we run with the wolves
If this love isn't the one we choose?
Are you ready to release me now
And let the sky fall to the ground?
Could we run with the wolves?
Could we run with the wolves?
Could we run with the wolves?
Could we run with the wolves?
