

Like me a Lot

B.o.B

You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit get real
You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit get real

Might say shit that you don't like like like
Might tell you a joke not a lie lie lie
Get real

You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit that's real

Well I guess I started something
Too soon to be triumphant
Cause the lives I've changed is humbling
If you give them something it's not hustling

Shit that's real
Tell me how it feel when you gotta pimp ya own race
If I was worried back the backlash
I wouldn't said half of the shit I say
On the mic I'm Tyson
Boy you should kneel and your nephew should be ashamed
Were you really tryna educate
Or tear another brother down on the world stage
I heard I needed protection, from who?
Only thing I shudda been shielded from was you
But a lesson well learned in how predators think
"Some one gon take advantage of you might as well be me"
Be glad when you know who the vampires is
Be more worried bout the niggas that you don't know yet
'Cause a system cannot fail those individuals
That it was never meant to protect
Ya might say I'm paranoid
Might not like the way that I talk
But why is it so many blogs?
Why I keep getting stalked?
Why do I get harassed?
Why I keep getting calls?

You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit get real
You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit get real

Might say shit that you don't like like like
Might tell you a joke not a lie lie lie
Get real

You might not like me a lot
You might not like me a lot
But you gon love me when I tell you shit that's real

Well I guess I started something
Too soon to be triumphant
Cause the lives I've changed is humbling
If you give them something it's not hustling

Well I've handed you lemons
Make lemonade?

No

First you roll out a multimedia campaign to convince people lemons are incredibly scary

Which only works if you stockpile lemons, control the supply

Then you write a line of genetic code that makes lemons look just a little more like tits

And you get a gene patent for the tit-lemon DNA sequence

You cross pollinate, you get those seeds circulating in the wild

And then you sue the farmers for copyright infringement when that genetic code shows up on their land

Sit back, rake in the millions

And then when you're done and you've sold your Lempire for a few billion dollars, then, and only then

You make some fucking lemonade

Lemons don't make lemonade

Lemons make grenades

Lemons don't make lemonade

Lemons make grenades

Lemons don't make lemonade

Lemons make grenades

Lemons don't make lemonade

Lemons make grenades
