B Young

Baby sexy no sexy not enough to describe you  
The way you get down you get me up there's no other like you

Got me biting, I'm biting on my lip  
Girl you got me infected like virus  
Oh you sweet like revenge girl you violent  
And you coming so loud when you're silent

You made me your enemy  
When you aimed at me  
Girl you got a man down  
Man down  
Man down  
Ooh

Baby beauty, no beauty not enough to describe you  
Girl your body the party that I need an invite to  
I see you fighting you're fighting don't hide it  
Show me what you've been holding in private  
When you walk in you switch off the climate  
When you let off the heat and ignite it

You made me your enemy  
When you aimed at me  
Girl you got a man down  
Man down  
Man down  
Girl you got a man down  
Man down

Stay down  
Girl you got a man down

Innocent better think again  
Girl you good with them lips call it intellect

You got a sweet tooth I got a sweeter tooth  
Sweet juice I'm tryna eat the fruit  
And girl I still can't get away from you  
I got my hands in the air so don't shoot

In front of a big old crowd
