Say goodbye □□□□□

Continuously in the future and even right now
Baby close to your heart
Close to your heart
Once I realize it, surely anywhere
Baby close to your heart
Close to your heart
Will I be able
To smile by your side like this
Someday once again?

Without showing my tears and instead with this lovingness
Say goodbye until we meet
If we're able to find the thing that is precious
Say goodbye once again

Raining down like stars in the night sky
It feels like I can touch you but you're far away
I am now alone
Underneath that sky that we looked up at together
Your heart that was warm like spring
My heart that was cold like winter
These overflowing feelings are forever
I'm close to your heart

Will I be able
To smile by your side like this

Someday once again?

Without showing my tears and instead with this lovingness
Say goodbye until we meet
If we're able to find the thing that is precious
Say goodbye once again

But I want to hug you
Because you see, I still like you, even now
I let the hands of the person
Who meant more than anyone else go

Will I be able
To smile by your side like this
Someday once again?

Don't be afraid to say these words
Say goodbye until we meet
If we're able to find the thing that is precious
Say goodbye once again
