

We Got The Tower

B3

Stop for a moment
Here's a message to you
It's a call to us all and
The things we must do
Got the cause for our visions
Got the force on our side
When the sky is the limit
When we go for the ride, yeah

R1:

Nothing can stop us
When we stand as one
When we come together
And we take on
We got it, we got it
We got it now

R2:

We got the power, get ready to go
We stand united, the energy flows
We got the power
The moment has come
Nothing can stop us
When we stand as one
Stop, let me tell you
Got to get back on track
It's a call to us all
And there's no turnin' back
I don't care what you've been doing
I don't care where you belong
From now on we're together
Cause together we're strong, yeah

Chorus 1 + 2x Chorus 2

We got the power, get ready to go
We stand united, the energy flows
We got the power
The moment has come
Nothing can stop us
We got it, we got it
We got it now, oh

R2:
