

I fell in love with a woman
I was giving her all she asked and more
I fell in love, but she wouldn't
I couldn't tell you what all this hurt was for
I wish I was dreaming
I wish you would find a reason
To learn to deal with your demons
Ain't no point fighting your feelings

You make me Mad... Happy... Sad and everything in between
Told me to stop, trapping, but you ain't the only mouth I feed
You make me Mad... Happy... Sad and everything in between
Told me to stop, trapping, but you ain't the only mouth I feed

Gotta take care of myself
Gotta get rich, win a Grammy
Ya only really care about yourself
I thought you was family
All you did was shit on your word
All you do is make me panic
I don't wanna wait too long
You and me a bad dynamic

Yeah, so long, so long, I'm gone I'm gone
Goodnight, goodbye, you're on your own
So long, so long, I'm gone, I'm gone
Goodnight, goodbye

You make me Mad... Happy... Sad and everything in between
Told me to stop, trapping, but you ain't the only mouth I feed
You make me Mad... Happy... Sad and everything in between
Told me to stop, trapping, but you ain't the only mouth I feed
