

# Bad Blood

Babylon A.D.

Whoo!

Mmm, yeah

Well, you better get yourself another, another fool  
'Cause I've danced for the last time  
Like a shoeshine boy, been kicked and bruised  
I've read the writing from the wall  
We never really had no chance at all  
And I've lost that certain type of respect, yeah, yeah  
'Cause you've done to me some things I know you will regret

Bad blood pumping, running hot through my veins  
I've tried to compromise, but there ain't much more to say  
Bad blood pumping, running straight to my brain  
I've got to warn you, there's bad blood pumping in me

Bad blood

Yeah, you play with me and my emotions, break the rules  
But I've heard your lies and your alibis  
All your promises you failed to do  
I don't need a doctor to figure you out  
Don't need a lawyer to cast my doubts  
'Cause your point of view is so plain to see, yeah, yeah  
You tried your best, but you'll never bring me to my knees

Bad blood pumping, running hot through my veins  
I've tried to compromise, but there ain't much more to say  
Bad blood pumping, running straight to my brain  
I've got to warn you, there's bad blood pumping in me

Ya, bad blood  
I've got a temperature rising in me

Well, you better get yourself another, another fool  
'Cause I've danced for the last time  
Like a shoeshine boy, been kicked and bruised  
Well, I've read the writing on the wall  
We never really had no chance at all  
And those things you've done, someday you'll regret  
My temperate's rising and there's bad blood pumping

Bad blood pumping, running hot through my veins  
I've tried to compromise, but there ain't much more to say  
Bad blood pumping, running straight to my brain  
I've tried to set it straight, but I guess I gotta break the chains

Bad blood pumping, running hot through my veins  
I've tried to compromise, but there ain't much more to say  
(Ain't much more to say)  
Bad blood pumping, running straight to my brain  
I've got to warn you, there's bad blood pumping in me

Bad blood

Oh, bad blood

Give it up, get loud

Oh, yeah
