

from me to u

BABYMETAL

Let's go

I know you're scared 'cause you're running for cover
But you might be running far
And if the demons know you're scared to death
Then they will find you where you are
Is there a virus infecting your system?
Have the cuts left an animal mark?
That will make you one of us
And we will never never never be apart

The evil has its motive
And now so do I
And I'll hold you to your fragile alibi

With this rage inside of me
Kiminitodoke
Kiminitodoke
Maybe now we can kill the enemy
Totemo kibishi
Stand up and make your move
Let the fire carry on, let the power go from me to you
From me to you

I need a friend that will never betray me
There's no time like where we are
I'm so bored, I don't care for the consequence
So I'll come find you where you are

Is it a sin if I wish for destruction?
Is it a call that I can make?
And I hail for the wrath of crimson on the faces in my way
And it goes from me to you

I've had enough from your mouth
You can shove it
'Cause you know you don't stand a chance

With this rage inside of me
Kiminitodoke
Kiminitodoke
Maybe now we can kill the enemy
Totemo kibishi
Stand up and make your move
Let the fire carry on, let the power go from me to you

Yami o nuke
Hikari to tomoni
Owari o tsugeta toki
Boku wa tada
Zetsubō o samayō no sa

You're doing this wrong
'Cause if the end is a promise
It's still looking up
I cannot rest till you're fucking breathless
As the strong intention has been justified

Hung from the edges, you'll rest with your lies
Rest with your lies

With this rage inside of me
Kiminitodoke
Kiminitodoke

With this rage inside of me
Inside of me
Kiminitodoke
Kiminitodoke
Kiminitodoke
Tekiwotaosu
Maybe now we can kill the enemy
