In Pieces

Backstreet Boys

So I lay awake another hour Just like the one before The shadows play a game with my head I can't take this anymore

I hear the sound Of my own breathing It makes me miss you more

Wake me up when it's over After the ending When the damage has all been done I don't wanna be somewhere Where you can watch me as I bleed Just leave me here in pieces In pieces

I can't take the chance Of running into You running into me So lock the door And close the window I just wanna see

Until the day Inside my future When I'll be on my feet

Wake me up when it's over After the ending When the damage has all been done I don't wanna be somewhere Where you can watch me as I bleed Just leave me here in pieces In pieces

If you want you can find me On the dark side of the sun Babe I don't wanna see what we've become The damage has all been done

Wake me up when it's over After the ending Wake me up when it's over When the damage has all been done The damage is done I don't wanna be somewhere I don't wanna be somewhere Where you can watch me as I bleed Leave me here in pieces Just leave me in pieces Just leave me in pieces Just leave me up when it's over (in pieces) Just wake me up when it's over
