You knock on my door asking for something I have never been asked for Should I say yes?
Or should I say no?
I want you to know

All the things that you say
They make me wanna stay
All the things that you do
They make me fall in love with you

Just one more kiss
And I believe that I'm in paradise
Just one more touch
I feel that an angel has passed me tonight

Water has turned into wine Come on and taste it Cause we're running out of time I'm ready to fly all through the night Let your love decide

All the things that you say
They make me wanna stay
All the things that you do
They make me fall in love with you

Just one more kiss
And I believe that I'm in paradise
Just one more touch
I feel that an angel has passed me tonight

Just one more
Just one more kiss from you
It's paradise
Just one more
Just one more touch
And I feel that an angel has passed me tonight

Time Time's not waiting

All the things that you say
They make me wanna stay
All the things that you do
They make me fall in love with you

Just one more kiss
And I believe that I'm in paradise
Just one more touch
I feel that an angel has passed me tonight
