

# Walk Through Fire

Bad Company

I used to see those red tail lights, heading for another town  
And wish that I was on my way  
Looking back on these summer nights, wasting time, fooling 'round  
And there was nothing here to make me stay

But that night I met you, the night you came through made me realise  
There's no way I can leave, you made me believe  
And now when I look in your eyes

I could walk through fire, I can feel it burning  
And I could walk through fire, (to get) right back to you  
And as the flames get higher, you know I'll get stronger  
Baby I could walk through fire

It's crazy how these things work out, I used to think I had no chance  
And I somehow thought you'd slip away  
You pulled me through the fear and doubt, gave me all I'm looking for  
Everything I needed to stay

How could something so good, something so simple, get serious  
How could someone so right come into my life, and now I just want you to know

And I would go anywhere, I would do anything, I do what you want me to  
You know that I would, I want you to know this, whenever you need me  
Ooh wherever you are, no matter how far, you know I'll be coming for you

Baby I could walk through fire, right back to you  
And I could walk through fire, and I could walk through fire  
And I could walk through fire, right back to you, yeah
