

## Television

Bad Nerves

Right left or blue red  
Give them warning their lives are dead ends  
Free press controlling minds of children you'll wish you never  
had  
Historic bad memory  
Polarised in your envy for them  
Question nothing  
Monetise empathy  
I don't want you thinking

'Cause he's always got the weather on his mind  
Yeah he's always got the weather on his mind

Raining  
They flood your house with information  
It's best you burn it  
More meds will make you feel better  
More meds will make you feel better

When you're working your hardest like a fool  
Made a martyr for not playing you're part in something you don'  
t believe in  
Am I losing my mind or am I losing my fear of it?  
Who's the prisoner?  
Pocket cameras watching us  
You are not alone  
You are not alone

'Cause he's always got the weather on his mind  
Yeah he's always got the weather on his mind

Television I love you  
Television  
Television I love you

Come on why's your TV still on?  
To all the lonely people here we are  
I know me or do I?  
If we could be of no-mind  
Never think at all

Rise up, rise up, rise up  
Last chance to know you're alive  
Last chance to know you're alive  
Television I love you
