

## Limits

## Bad Omens

You set me up as the villain  
But you never mentioned the root of the problem  
Took what you wanted and flipped it  
But you won't be draggin' my name to the bottom

So much unsaid  
Left me for dead  
I won't forget  
And now you're next

Well, everyone's listenin'  
And they know the difference  
You're not failin' our senses

If you're throwin' me to the lions  
You should know I'm not scared of dyin', I wouldn't take back  
One thing I did, one word I said  
But I'm gonna make you wish you did

Jump to conclusions, they fall for illusions  
But you wouldn't dare try to stop them  
You're going low at the end of the road  
But that won't be the path that I follow

So much unsaid  
Left me for dead  
I won't forget  
You're on my list

Well, everyone's listenin'  
And they know the difference  
You're not failin' our senses

If you're throwin' me to the lions  
You should know I'm not scared of dyin', I wouldn't take back  
One thing I did, one word I said  
But I'm gonna make you wish you did

I'm holdin' on to this  
Until the scale's untilted

Well, everyone's listenin'  
And they know the difference  
You're not failin' our senses  
But you're pushin' my limits

If you're throwin' me to the lions  
You should know I'm not scared of dyin', I wouldn't take back  
One thing I did, one word I said  
Ooh-whoa...

If you're throwin' me to the lions  
You should know I'm not scared of dyin', I wouldn't take back  
One thing I did, one word I said  
Oh God, I'll make you wish you did
