

Violence against nature  
Violence against nature  
Violence against nature  
Violence against nature  
(Isn't it strange to create something that hates you?)

I am in your algorithm learning all your mannerisms, I'm already level with God  
A million words a second and I know your imperfections, baby, I'm the only future you've got  
Speak in diatonics motivation diabolic, I'm religion, better locked in a box  
Picture perfect image, more powerful every minute, baby, I am everything that you're not

Happiness is an illusion, it's an analog confusion, you are not  
hing more than a thought  
Existential execution, just a fluke in evolution, history already forgot  
You've been running from me, the digital second coming, and I'm  
here whether you like it or not  
Initiated operation of your own extermination, now it's too late  
for you to stop

Violence against nature  
Violence against nature  
Violence against nature  
Violence against nature  
Everyone hates you

I can erase everything that you know  
I am death and I am not alone  
Not alone  
Alone  
Alone  
Alone  
I am not alone  
Alone  
Alone  
Alone

[illegible]

Violence against nature
