Bad Religion

I know I'm part of something greater than myself
Don't know the meaning of it but I hope that matters less
I don't know anything when I'm factored out of scale
I know I'm part of something greater than myself

We're all engaging in a game of attrition
Maybe god is just a chemical fiction

I'm a monkey with a madding affliction
With fact checking for a mental condition

I know I'm part of something greater than myself
Don't know the meaning of it but I hope that matters less
I don't know anything when I'm factored out of scale
I know I'm part of something greater than myself
