

## Downfall

Bad Religion

It's never really clear when the end is near  
Till you take a hard look in the rearview mirror  
I'm pretty sure we're just running on fumes  
No one really cares about the route

Beaches break down and the waves retreat  
Are we stuck in some perpetual repeat?  
Maybe we're like massive cliffs of sand  
Waiting for the plates to smash again

Downfall, gravity calls  
Entropy makes fools of us all  
Downfall, you can't forestall  
It's the proof there ain't no invisible hand

No one 'round here can contain their fears  
Just contented with false hope to soothe the tears  
Faith is king while truth is on the lam  
Disenfranchised scientists be damned!

Downfall, gravity calls  
Entropy makes fools of us all  
Downfall, it's a natural law  
And the judge don't have no use for the witness stand

Downfall, it's a natural law  
Entropy makes fools of us all  
Downfall, kill the guy with the ball  
And make sure he can't get up to take a stand!
