

Foe or Friend

Bad Wolves

D-d-d-d-desperate and defeated
Look in his eyes their both dilated
T-t-t-t-time stands still awaits
As his hands grip the bars of a cell
Bye bye bye goodbye to your life
When your f-f-f-freedoms taken away
And there's 666 carved into your wrist
And they throw away the key

Foe or friend
I will not fail again
The sickness is my witness
And I know this is the end
Foe or friend
I will not fail again
The sickness is my witness
And I know this is the end

Hang me from the rope
My name engraved in stone
A needle full of dope
Don't pick up the phone

Replay the tapes of mistakes
As the v-v-v-void delights in despair
M-m-m-m-my misery
Defined by his own disrepair
D-d-d-d-desperate and defeated
Look in his eyes their both dilated
666 carved into your wrist
And they throw away the key

Foe or friend
I will not fail again
The sickness is my witness
And I know this is the end
Foe or friend
I will not fail again
The sickness is my witness
And I know this is the end

Hang me from the rope
My name engraved in stone
A needle full of dope
Don't pick up the phone

Hang me from the rope
My name engraved in stone
A needle full of dope
Don't pick up the phone

Don't pick up the phone
Don't pick up the phone
I beg you
Don't pick up the phone
Don't pick up the phone
Don't pick up the phone
