

Hungry For Life

Bad Wolves

Tell me how

Tell me how

I got nothing to say

Tell me why

Why my tombstone is blank

'Cause I'm not the one who won't try

I'm not letting life pass me by

Tell me when

When the days are less gray

Tell me where

Is the road to less pain

How many days

Before I decay?

It's getting so hard to get by

Where are all my trophies in life?

And he hated the way he was dying

But the moment he turned on the light

He became what he dreamt of at night when he was

Young and hungry for life

Set the sail

To a place I can't say

Live a life

A life worthy of chase

The time is today

You put in my rate

I won't be the joker in life

Playing the part I don't like

And he hated the way he was dying

But the moment he turned on the light

He became what he dreamt of at night when he was

Young and hungry for life

And he hated the way he was dying

But the moment he turned on the light

He became what he dreamt of at night when he was

Young and hungry for life

And he hated the way he was dying

But the moment he turned on the light

He became what he dreamt of at night when he was

Young and hungry for life

Young and hungry for life

Young and hungry for life

Young and hungry for life

Young and hungry for life
