

Save my life when I'm too far gone  
Be my savior, be my savior and don't let go

Call it what you want now, baby  
Does it matter if we're breaking down?  
Push it through your teeth, I can taste it  
Do you feel the walls closing around?

I paved good intentions, something is missing  
Just know you're not alone

You're my hope when I can't hang on  
You're my light when the night's too long  
Save my life when I'm too far gone  
Be my savior, be my savior and don't let go

I never meant for isolation  
I always felt the thorn stuck in my side  
Call it what you want now, baby  
Keep pushing through the pain we can't deny  
Just know you're not alone

You're my hope when I can't hang on  
You're my light when the night's too long  
Save my life when I'm too far gone  
Be my savior, be my savior because I'm lost

You're my hope when I can't hang on  
You're my light when the night's too long  
Save my life when I'm too far gone  
Be my savior, be my savior

You're my hope when I can't hang on  
You're my light when the night's too long  
Save my life when I'm too far gone  
Be my savior, be my savior and don't let go

Be my savior and don't let go
