

The Conversation

Bad Wolves

The system they set for enslavement
In present pervades
A corporate monarch of bastards
We've all been betrayed

It's time that we question, it's time that we changed
The next generation fully disengaged
Unconscious society serving as slaves
The fear justifying the wars they have waged

And now we're just evading
This conversation must be had
And are we just maintaining
The constitution of despair
In disrepair

The system they set for enslavement
In present pervades
A corporate monarch of bastards
We've all be betrayed

Media fought with the duplicity
Controlled by machines of the oligarchy
A corporate reign in the land of the free
Applauding the death of our democracy

And now we're just evading
This conversation must be had
And are we just maintaining
The constitution of despair
And now we're just evading
This conversation must be had
And are we just maintaining
This constitution
This constitution of despair

In disrepair
A constitution in disrepair
In disrepair
A constitution in disrepair
In disrepair

And now we're just evading
This conversation must be had
And are we just maintaining
The constitution of despair
And now we're just evading
This conversation must be had
And are we just maintaining
This constitution
This constitution of despair

In disrepair
