

Veterans

Badlands

Now and then, there's a reunion of old men who fought in war

They march by in wheelchairs and with sticks in their hands

You might laugh about them because they look silly and old

But keep in mind they did the job in war

Chorus (2x):

See the old veterans marching by

With a Dutch flag raised high in the sky

We won't forget what they did during the war

A generation starving out, so pay attention and show some respect

Listen to their tales, you might learn something useful

This might be the last time that we can see our heroes alive

These are the men to which I pay respect

Chorus (2x)

We salute our heroes of the past

See our flag waving in the sky

May this moment last forever

Hail the veterans ... (3x)

... Their spirit never dies

Chorus (2x)
