

## Can't Take You With Me

Bahamas

I can't take you with me where I'm going  
In me there's a new love that has growin'  
So now I leave behind all that once was mine  
I can't take you with me where I'm going

I can't take you with me that's for certain  
Anchored to some heavy red stage curtain  
If I should hear you sing  
Those words would just make me sting  
I cant take you with me, that's for certain

I can't take you with me now I know it  
Though the love was in me I did not show it  
I found in Berlin who I swore might be my twin  
Taken from me with out me ever knowin'

You can't take me with you where you're goin'  
You've got no intentions of ever slowin'  
My book of baby names  
Only does family flames  
I dreamt we had a boy and named him owen.
