

Lonely Loves

Bahamas

Somebody help me
I can't do it on my own
You break your word, not enough
You end up breaking your back bone

I must have been dreaming
And dreamt you climbed into my bed
But in the morning I woke up
And the whole thing was in my head

Lonely love, lonely love
Might be forever
For all the better lonely loves

We could keep going
And let this get out of hand
It'd be nothing new
For me or for your boyfriend's band

Stone cold sober
But you still get me high
Go ahead, I could laugh with you all day
Make love to you all night

Lonely love, lonely love
Might be forever
For all the better lonely loves

But my lonely love, my lonely love,
Might be forever
For all the better lonely loves
