

What's Worse

Bahamas

Tell me baby, tell me how could it be
After being with him you'd want someone like me
'Cause I know you don't love me
What's worse, you might love someone else

Take your time, take your time
You could have all the time in the world
If you'd only be mine
But I know you don't love me
What's worse, you might love someone else

When you remember me darling I hope it makes you smile
I love driving you crazy if only just for a while
But I know you don't love me
What's worse, you might love someone else
Yeah I know you don't love me
What's worse, you might love someone else

Quit sweet-talking honey 'cause it don't cut through
You could talk all night or when I see your tattoo
I know you don't love me
What's worse, you might love someone else

We both knew it then and we both could tell
I love only the flames, got no chance in Hell
I know you don't love me
What's worse, you might love someone else
