Kills Me

Bahari

It kills me

I've been feeling used, uh-huh
My heart's been ripped in two
My heart's screaming, but my words are silent
'Cause I know there's nothing left to say
If I could hold you just for one brief moment
Maybe I could ease the pain

We've run out of moves
And this time we both lose

Only you know how to love me
Everybody wants to fix me
Only you know how to love me
When I'm by myself it kills me

I've been feeling down
The only memories, they're gone now
Feel so empty since the day you left me
And I'm losing everything I know
Night is falling and it's fast as bullets
And I think I've lost control

Last time or the first
Don't know which is worse

Only you know how to love me
Everybody wants to fix me
Only you know how to love me
When I'm by myself it kills me

Only you know how to love me
Everybody wants to fix me
Only you know how to love me
When I'm by myself it kills me
