

Needs

Baio

I fell off a slide and cut my face
Sagamore Park, early drinking dates
It stung a little, but I felt fine
It's a version of myself I look to hide

And even if you can't quite understand
The man I was before we met
Someday you'll see

I promise that I'll never Except when you make me promise to
You've got your needs

When you look straight at a mirror and see yourself
Tell me, do you like the vision or do you want something else?
When I look into a mirror, the man I see
Is a vision of the person I want to be

And even if you can't quite understand
What I meant what I said this wasn't planned
Someday you'll see

I promise that I'll never Except when you make me promise to
You've got your needs

You've got your needs
You've got your needs
You've got your needs
You've got your needs

I sat in a chair, leaned back too far
Cut my head against the wall, still have the scar
I was eight years old, anyone could see
I do better when I have someone watching me

I've got my needs
I've got my needs
I've got my needs
I've got my needs
