

You Will

Bakar

I used to dream like you were nothing more
I brand new beam I don't do nothing for
I'm still fucked up inside I'm not sure
You should know it's not that serious
In the morning make your cereal
And they always say that shit
And you normally catch my drift

You were always still like this
This ain't an easy place to win
But you will you will you will
You will you will you will
You will you will you will
You will you will you will

It's a thousand niggas tryna fly
Used to party kings and road had an alibi
Started of kinda shy
Then I grew my wings early gotta see the sky
Early on the eastside
[?] man I got the easy side
Still study in the mean time
Fell in love playing slots like the seaside

You were always still like this
This ain't an easy place to win
But you will you will you will
You will you will you will
You will you will you will
You will you will you will
