

A Lesson in Gravity

Ballyhoo!

I can't believe I'm standing here
I thought my world's ending was near
I guess I was wrong about that
Cause life goes on

I prove that nothing's set in stone
I got a family of my own
I keep my head up for them
Cause life goes on

No one's gonna save me
No one's gonna overtake me
Nothing to prove
and I got so much to lose
But I get through
Yeah, I'll get through

I felt the weigh of gravity
I'm only who I have to be
The moment arrives so fast
and then it's gone

I'm just a stranger in this town
Someone is up and someone's down
You can envy what others have
But then it's gone

No one's gonna save me
No one's gonna overtake me
Nothing to prove
and I got so much to lose
But I get through
Yeah, I'll get through

We could stand here all night
I could tell you it'll be alright
Until you see firsthand
and you just won't understand

I can't believe I'm standing here
I thought my world's ending was near
I guess I was wrong about that
Cause life goes on

No one's gonna save me
No one's gonna overtake me
Nothing to prove
and I got so much to lose
But I get through
Yeah, I'll get through

I felt the weigh of gravity
I'm only who I have to be
The moment arrives so fast
and then it's gone
