

Beach Party

Ballyhoo!

I was just 14 when I started this band
And it was cool cause I could play the guitar
A kid from Aberdeen with a master plan
Sounds of the beach and some words from the heart

I always knew I wanted this to go somewhere
I knew the path was the yellowbrick road
And all the stories of my life that I've shared
Makin' connections and I'm crackin' the code

Been workin' all of our lives
Vacation for you and I
Let's go together

Tell me what you want, I got it (I'll make it happen)
Tell me what you need, I got this (Starting the fire)
We can spend all night on this island (Workin' it out)
Let's read the messages in the bottle (It's your turn to drink now)

So many people comin' up to me
Sayin' this music is a therapy
Such few words mean so much to me
So I just want to say thank you

Now back to the subject at hand
Seems we're improving some lives with this band
Been rockin' stages across the nation
Sendin' them nothin' but good vibrations

Tell me what you want, I got it (I'll make it happen)
Tell me what you need, I got this (Starting the fire)
We can spend all night on this island (Workin' it out)
Let's read the messages in the bottle (It's your turn to drink now)

Oooo what would I do
If I had never been driven to play in my room
You see these songs help you but they help me too
I pilot a comet, the stars, and the moon
We made this place to
Escape from our day's who
Just know you can come here whenever you need to

Tell me what you want, I got it (I'll make it happen)
Tell me what you need, I got this (Starting the fire)
We can spend all night on this island (Workin' it out)
Let's read the messages in the bottle (It's your turn to drink now)

Tell me what you want, I got it (I'll make it happen)
Tell me what you need, I got this (Starting the fire)
We can spend all night on this island (Workin' it out)
Let's read the messages in the bottle (It's your turn to drink now)
