

Last Dance

Bamboo

Here you go flesh and bone hard to work
All the money in the world won't save your soul
To find a peace put it to your head means to end it all
I could help you if i just understand a single word you've said

At this pace, I don't mean to slow you down
You got plans and places to go to it's all you think about
It's all you think about

I'm sorry about wasting your time
I've done my best to provide
Always just never enough for you
All I've left is my pride
Will you stand right with me through the end
Or will this fight be our last
Our last dance
Our last dance

Burden by what's out there
Whats been left of us
Trying to find your way back
Lying your bliss tonight
Enough for this bitter about
You want me to show you how stop
Dancing right forget whats this fools
As sounds do what we talked about
And brace the fall break the line
You dressed ready for no argue back
At the stand now

At this pace, I don't mean to slow you down
You got plans and places to go to it's all you think about
Its all you think about

I'm sorry about wasting your time
I've done my best to provide
Always just never enough for you
All I've left is my pride
Will you stand right with me through the end
Or will this fight be our last
Our last dance
Our last dance

Oh how is it going so far?
To some expanded life
Just going with the crowd
On a cue and to smile
Well your prompted sent to started it today
Simply say the word so we don't replay
Symphony that is you and
Let's get back to what you went born someday

I'm sorry about wasting your time
I've done my best to provide
Always just never enough for you
All I've left is my pride
Will you stand right with me through the end

Or will this fight be our last
I'm sorry about wasting your time
I've done my best to provide
Always just never enough for you
All I've left is my pride
Will you stand right with me through the end
Or will this fight be our last
Our last dance
Our last dance
