

# Take Me Away

Bananarama

Take me away with you  
Where we can do  
All the things that we have ever wanted to  
Take me away somewhere  
Where we can share  
This love

I close my eyes, now it's clear  
Feels like I've been sleeping for a million years  
'Till you came, I couldn't see  
Now your kiss is breathing life back into me

Why worry about the world outside  
We've got everything we need

Take me away with you  
Where we can do  
All the things that we have ever wanted to  
Take me away somewhere  
Where we can share  
This love

How can I love you more  
Heaven knows that you're the one I've waited for  
Now you're here, no more tears  
Hold my hand and baby we can disappear

Why worry about the world outside  
We've got everything we need

Take me away with you  
Where we can do  
All the things that we have ever wanted to  
Take me away somewhere  
Where we can share  
This love

Why worry about the world outside  
We've got everything we need

Take me away with you  
Where we can do  
All the things that we have ever wanted to  
Take me away somewhere  
Where we can share  
This love

Take me away with you  
Where we can do  
All the things that we have ever wanted to  
Take me away somewhere  
Where we can share  
This love
