More Than Meets The Eye

The Bangles

```
   B                        E                          B
1. He's got a slow slow ride, got a camera inside
    A                     C#m              B
   He takes a picture, hangs it up to dry
                           E                           B
   And there's one girl named, and another displayed
    A                  C#m                      B
   All the time you can't help feeling ashamed
     A          C#m           E
   Given new reasons to survive
    A             C#m             F#m   B
   He keeps a number of them alive
              E                Asm
   There's a warning in the sky
        E                 Asm
   A stranger passing by
                 E                        As         C#
   And there's more than meets the eye to the guy.

2. When you're so secure, never feeling unsure
   That's the time to check behind your door
   Cause there's one thing said when another is meant
   He's around confusing you to the end
   Seeing how changeable you feel
   Don't think that happiness is real
   And it's hard to justify
   The tangle you untie
   And there's more than meets the eye to the guy.
```
