Fireproof

Banner Pilot

Hungry on the porch at night
But these lean days haven't broke us yet
Stronger by the struggle right?
Remind me on the days that I forgot

Put your hand inside of mine
It feels electric every time I hold you
Outside the sky has turned a lighter blue
And there's not a lot I can promise you
That we can still be happy even if we fall
In a certain light it's kinda like we have it all

The city lights above this street
They're so blue and white and red and green
Breathing in the world at dusk
It's like every one is glowing just for us

Put your hand inside of mine
It feels electric every time I hold you
Outside the sky has turned a lighter blue
And there's not a lot I can promise you
That we can still be happy even if we fall
In a certain light it's kinda like we have it all

Outside the sky has turned a lighter blue
And there's not a lot I can promise you
That we can still be happy even if we fall
In a certain light it's kinda like we have it all
