

Sun Belt Scars

Banner Pilot

If you can walk or crawl
Then lets leave this hospital
And take this car far as it goes

Lost and kicked about
Sun belt scars remove all doubt
But cover up this chapters closed
No, this world ain't all snow

So rip the ivs that grow from your heartbreak you know
They don't look as bad underneath real light
And make your way through the door to the sidewalk lets go
Coasts a day if we drive all fucking night

Harbor next stop
A Florence backdrop
It cheers me up knowing some things never change
Like the pacific ocean
Watch the sand dunes blow
And set the waves in motion
Bring you back to life back to life

Let dreams cut through the gloom
Of this lonely waiting room
It's love today but then it goes, no
It always seems so
