

Crashing waves, sparkling
They take me back to you again
Distant shores, on the horizon
Where you'll be waiting with those eyes

Worlds apart, when it went dark
You were always on my mind
Illuminate, set ablaze
You make me light up like a firefly

Like fireflies

Diamond skies, flickering
Like fading fires still burning
Against it all, we'll keep on rising
It leaves me aching to see those eyes

Worlds apart, when it went dark
You were always on my mind
Illuminate, set ablaze
You make me light up like a firefly

Like fireflies
You make me light up like a firefly
Like fireflies
You make me light up like a firefly

Every night a little lighter
All the noise a little quieter
And it's just you and I
Like fireflies

Like fireflies
You make me light up like a firefly

Worlds apart, when it went dark
You were always on my mind
Illuminate, set ablaze
You make me light up like a firefly
Worlds apart, when it went dark
You were always on my mind
Illuminate, set ablaze
You make me light up like a firefly
