

# Miles Away

## BANNERS

Ever feel like there's something missing?  
Like you're shouting but nobody's listening  
That you're always left outside looking in, looking in

'Cause the way that the world keeps spinning  
How could anyone call this living?  
When I needed somebody to get me away, then you came

I was stuck and coming undone, heaven, help me  
You're the only one out there that could pick me  
Up you make escape seem easy  
You are the only heartbeat that could take me

Far away, far away, far away from here  
I wanna be miles away, miles away, we can disappear

Now I got your dreams by my side  
Let's take the whole world out for a ride  
Yeah, we'll leave all the warning signs in the dust  
Leave it all behind

Seems like nothing I couldn't do  
There's no desert I can't get through  
I got it all if I got you  
On my mind, yeah the truth is

I was stuck and coming undone, heaven, help me  
You're the only one out there that could pick me  
Up you make escape seem easy  
You are the only heartbeat that could take me

Far away, far away, far away from here  
I wanna be miles away, miles away, we can disappear

And you're always bringing me round  
When it seems like the whole world's dragging me down  
And all the love you're giving me here  
Is the reason I feel like somebody now  
Feel like somebody now

I was stuck and coming undone, heaven, help me  
You are the only heartbeat that could take me

Far away, far away, far away from here  
I wanna be miles away, miles away, we can disappear

My my, my miles away  
My my, my miles away  
My my, my miles away  
My my, my miles away

My my, my miles away  
My my, my miles away
