## BANNERS

Before you felt it how could you know?  
When the wilderness was natural  
The sun and the moon and everything below  
Was set to explode (Supercollide)  
How could you miss it? If you've never been told  
That you're seeing every colour monochrome  
Before the reason, before the light  
Out of the darkness supercollide

I'm shaking salvation  
I'm flying faster and faster and I  
I was the darkness and you where the light  
Tear it apart and then we supercollide  
(I was the dark and you were the light)  
We supercollide  
And then we supercollide  
(I was the dark and you were the light)  
We supercollide

And then I saw you time was still  
All my mysteries turn to miracles  
This is our age of reason, carve it in the stone  
Down to the bone (Supercollide)  
You know I'd miss you if we tore apart  
The center of my universe is in your arms  
And all the chaos crystallised  
When you and I supercollide

I'm shaking salvation  
I'm flying faster and faster and I  
I was the darkness and you where the light  
Tear it apart and then we supercollide  
(I was the dark and you were the light)  
We supercollide  
And then we supercollide  
(I was the dark and you were the light)  
We supercollide

And if I ever fall from grace  
Under the veil of the dark age  
I'll never be lost again  
To the ghost living in my head  
'Cause you are the question and you are the truth  
And you are the answer and everything's you  
Now there's a reason, now there's a light  
Out of the darkness then we supercollide

I'm shaking salvation  
I'm flying faster and faster and I  
I was the darkness and you where the light  
Tear it apart and then we supercollide  
(I was the dark and you were the light)  
We supercollide  
And then we supercollide  
(I was the dark and you were the light)  
We supercollide

I was the dark and you were the light

I was the dark and you were the light

I was the dark and you were the light
