

Fuckwit

bAnoffe

My car's here
Sitting here waiting
For you to come out
And ask me to stay

And it's 4am
You're in there sleeping
I know you're not alone
I guess I'm leaving

I told you I don't fall for the little things
This isn't little
This is so much more
I told you I don't sweat the little things
This isn't little
This is so much bigger than small

I don't know why I feel so angry
This is not my primary emotion
I don't know why I feel so angry

I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me
I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me

Watching my phone light
And it isn't flashing
Thought you would realise
Where you went wrong
Fuck all your t-shirts
I know you're bluffing
So tired of all the talk
Leading to nothing

You said you only fall for the bigger things
Do you think I'm little?
I'm so much more
You said you only sweat the bigger things
We're bigger than little
We're so much bigger than small

And I know why I feel so angry
This is not my primary emotion
I don't know why I feel so angry

I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me
I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me

I hope they think you taste good
I hope they love you

Like you so desperately need someone to
I hope you think you do good
I hope you do too
I know you could do good
Just if you want to

I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me
(I hope they love you)
I guess you must really have fucked with
I guess you must really have fucked with
I guess you must really have fucked with me
I hope they love you
I hope they love you
You're so desperate
You need someone to
I hope they love you
I hope they love you
