ECO DEPRESSION

Banshee

The earth is in flames
And we're taught to blame the blameless
So the rich keep getting richer
Fuck every corporation that says they'll get us out
And fuck every politician that let the water run brown

We were told from birth
That our planet's gonna die
And I hate waking up
In a world with no regard for life

We were told from birth
That our planet's gonna die
And I hate waking up
In a world with no regard for life

We were told from birth
That our planet's gonna die
And I hate waking up
In a world with no regard for life
