

Electronic Company

Barcelona

With your hardware your almost new
With my eyes closed your almost human
My video won't stand me up tonight
My stereo knows how to warm a room
Given a choice I choose electronic company
No pain... no hassles just electricity

With your hardware your almost new
With my eyes closed your almost human

I'm building a device to take your place
My Pentium can not ignore my voice
Given a choice I choose electronic company
No pain no hassles
Just electricity
Given a choice I choose electronic company
No pain no hassles
Just electricity
