

# Till Death

Barcelona

This is the place, this is the sound  
A dark cloud overhead the people on the ground  
You can hear it on the air and feel it in the breeze  
It's coming for us both before we try to leave

You looked right to me  
With tender eyes and shaking knees  
This dire sound is scaring me and you looked right to me

I said if we could go back  
If we had time for that  
Oh would you change anything  
Well you said "this is my last breath  
And I'll leave with no regret  
This life is over but I had you 'til death"

The suns burning up, waves crashing down  
We've pushed far out to sea, we're left out here to drown  
And we heard it all before, how we come to die  
But just before it ends the people start to fly but...

That won't change a thing, cause everyone I know has wings  
We can fall asleep, kick and scream  
But that won't change a thing

I said if we could go back  
If we had time for that  
Oh would you change anything  
Well you said "this is my last breath  
And I'll leave with no regret  
This life is over but I had you"

Left alone I can't decide  
I feed my monster deep inside  
Well this hunger brought me here tonight  
Help me see straight, I may not be right

Well I said if we could go back  
If we had time for that  
Oh would you change anything  
Well you said "this is my last breath  
And I'll leave with no regret  
This life is over but I had you 'til death"
