

Virus

Barrington Levy

We need it now
Yes we need it now
We need it now

Virus, spreading love around the world
Like a virus, spreading love around the world
We need an epidemic, where there is no cure
Like wildfire, love is what we need for sure

In a world that's goin' slowly insane
We watch tomorrow going up in flames
Evil people try to change our lives
To be free we gotta fight the fight

What we really need
What we really want
Is something to heal the pain, yeah
We can't waste a minute
We've got to contain it
[?] that is not a game

Virus, spreading love around the world
Like a virus, spreading love around the world
We need an epidemic, where there is no cure
Like wildfire, love is what we need for sure

Every day we hear it on the news
It's a battle that we just can't lose
We're gonna face the great unknown
All together, we stand alone

What we really need
What we really want
Is something to heal the pain, yeah
We can't waste a minute
We've got to contain it
[?] that is not a game

Virus, spreading love around the world
Like a virus, spreading love around the world
We need an epidemic, where there is no cure
Like wildfire, love is what we need for sure

Virus, spreading love around the world
Like a virus, spreading love around the world

We need it now
Yes we need it now
We need it now
We need it now

V-v-v-virus, spreading love around the world
Like a virus, spreading love around the world
We need an epidemic, where there is no cure
Like wildfire, love is what we need for sure

Virus, spreading love around the world

Like a virus, spreading all around the world
Round the world, round the world
