

Maybe It's You

Barry Palmer

You sat down next to me, I felt electricity and
I do believe you sent a shock to my heartbeat
And then I caught your smile and right at that moment
I swear I was in heaven on earth.

And then you looked inside me but you never said a word
Lifted your hand and you touched my face
And it felt so good I had to turn away.

Don't know what it is
But I shake and I fizz with you
Maybe it's you
Don't know what you've got
But you hit the spot it's true.

I was living in a different world, not looking for a girl
You walked in to my life and shattered my peaceful
You took away all my doubt, showed me what love's about
You turned my whole world upside down.

And then you looked inside me but you never said a word
Lifted your hand and you touched my face
And it felt so good I had to turn away.

Don't know what it is
But I shake and I fizz with you
Maybe it's you
Don't know what you've got
But you hit the spot it's true.

Did we meet in a previous life and did send you away?
If it's true all I can say is sorry but this time I want you to stay.

And then you looked inside me but you never said a word
Lifted your hand and you touched my face
And it felt so good I had to turn away.

Don't know what it is
But I shake and I fizz with you
Maybe it's you
Don't know what you've got
But you hit the spot it's true.
Maybe it's you
Don't know what you've got
But you hit the spot it's true.
Maybe it's you
Don't know what you've got
But you hit the spot it's true.
